

DVR-F800PRO

Anleitung zum Firmware-Update

Update Instructions

1. Download the file "**DVR-F800PRO_ver1.004.zip**" to your computer, for example to the folder for downloads and follow the instructions.
2. The download file is compressed in zip format.
3. The next step is to unpack the contents of the download onto the Dash Cam's memory card.
4. Take the Memory Card out of the Dash Cam.
5. Insert the Memory Card into your computer and open the Memory Card content (see picture right).
6. The contents of the download file "**DVR-F800PRO_ver1.004.zip**" need to be extracted to the root folder of the memory card (see picture right).
7. The two new files "**F800PRO_boot.bin**" and "**F800PRO_pkg.bin**" from the .zip file are now stored in the root folder of the memory card (see picture on right).
8. Remove the memory card from your computer and reinsert it into the Dash Cam.
9. The new firmware starts automatically after ACC ON or after starting the engine. The system will restart once the firmware update is completed.
